Dear Harold:

Just a note about a local TV news interview program that I just finished watching. It was on WYSE, channel 6 in Columbus, Ohio with [redacted] the host and interviewer. The guest was [redacted], who is on the Assassinations Materials Review Board. He said a number of thins I thought you might find of interest.

The gist of his comments was that they board was appointed in response to the movie "JFK," and that [redacted] would be done [redacted] Oswald did it alone. Later he came off that a bit and said that regardless of which side you take on the issue, both sides should be glad the record is made public. He pretty much took the Newsweek line that, yes, there was a cover-up, but that it was not to cover up the actual result, meaning that Oswald did it, but for other reasons that had to do with security and protecting [redacted].

He said they had a staff of 15 and, I believe, a 12½ million dollar budget.

I am going to try to get the transcript of the show if I can, and if I am able to do that, I will forward you a copy to keep. Failing that, if you like, I will try to entact Dr. Hall (a historian with legal background), and, with your permission, give him your name, number, and a good time for him to call you and have you talk with him directly. If that is not ok, if you have questions you would like me to ask him, I can do it, because I believe he is at Ohio State, where I will be taking a graduate course this winter.

It is has turned cold and snowed some last evening. I have been fighting off a cold, but nothing to keep me down. We get off school December 21, until January 3.

I hope this finds you well and happy. Best wishes.

Sincerely
Dave Lifton
